Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 28-33, 35-38, drawn to a mucoadhesive polymer exhibiting a total work adhesion of more than 120 micro jules to intestinal mucosa at a pH of 7.

Group II, claim(s) 39-47, 82-86, 87-88 drawn to pharmaceutical compositions having polymer not more than 10 different monomers and methods of use thereof.

Group III, claim(s) 48-53, 89 drawn to a method of enhancing permeation of active substances through mucosa.

Group IV, claim(s) 54-55, 90-91 drawn to methods of inhibiting enzymes in an individual,

Group V, claim(s) 56-66, 70-73, 92-99 drawn to methods of preparing a mucoadhesive polymer.

Group VI, claim(s) 67-69, drawn to methods of preparing a pharmaceutical composition comprising a mucoadhesive polymer having not more than 10 different monomers

Group VII, claim(s) 74-81, 100-109 drawn to mucoadhesive polymers having not more than 10 monomers.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

EP 0, 556, 110, EP 0, 635,276 submitted in the international search report and the US Patent 5,496,872 (already on record) teach all features of Group I, V, VI and VII. Accordingly, the claimed invention do not feature any inventive concept over the knowledge in the art.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Various polymeric moieties encompassing numerous monomeric units.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

1-33, 35-109

The following claim(s) are generic: 1, 39, 48, 50, 53, 54, 55, 56, 6770, 74, 82, 89, 91, 92, 99, 100, 101, 109.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each of the various polymers do not share a common core.

A telephone call was made to Donna Meuth, but Examiner was informed that she is no longer with the firm. Accordingly a written restriction was sent due to the complexity of the restriction requirement. See MPEP 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shahnam Sharareh whose telephone number is 571-272-0630. The examiner can normally be reached on 8:30 am - 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan, PhD can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
